D.No 11-1-23, Upstairs Dr V V G Mansion, Near 3 Lights Junction, Prakasam Street, Rama Rao Peta, Andhra Pradesh - 533004

Professional Summary

Highly motivated Computer Science B.Tech student with a strong academic record (8.59 CGPA), specializing in software development, AI/ML, and intelligent automation. Proven ability in full-stack Java, Python, and web technologies through diverse internships and impactful projects. Proficient in cloud platforms like Azure and AWS, with a keen interest in leveraging technical skills to drive innovation. Eager to contribute to cutting-edge software solutions at Microsoft.

Education

B.Tech	8.59
Aditya College of Engineering and Technology Surampalem	2021-2025
Intermediate (12th)	97.1
Sri Vikas Junior College	2021
10th Class	10
Board of Secondary Education Andhra Pradesh	2019

Skills

- C
- Python
- Java
- JavaScript
- HTML
- CSS
- Responsive UI
- Machine Learning
- Deep Learning (Basics)
- Arduino
- Hardware Integration
- Blue Prism (RPA)
- Azure
- AWS
- Oracle Cloud
- Cybersecurity Fundamentals
- MS Office Suite
- Git
- Object-Oriented Programming

Experience Highlights

- Applied fundamental cybersecurity principles and network security concepts during an internship with Beacon Paloalto Networks, fostering a secure development mindset.
- Engineered Robotic Process Automation (RPA) solutions using Blue Prism, automating manual processes and demonstrating proficiency in intelligent automation.
- Designed and implemented responsive user interfaces with HTML and CSS during a Frontend Development Internship, emphasizing user experience and accessibility.
- Participated in Microsoft & SAP's TechSaksham AI initiative, gaining exposure to transformative AI technologies and foundational concepts crucial for future development.
- Developed and evaluated machine learning models during a SkillDzire internship, focusing on data preprocessing, algorithm selection, and performance optimization.
- Gained end-to-end software development experience through a Full Stack Java Internship, building applications with front-end, back-end, and database integration.
- Explored embedded systems and IoT by developing projects with Raspberry Pi, integrating hardware and software for specific functionalities.

Projects

Sign Language to Voice Conversion and Home Automation

Developed a system that interprets hand gestures for sign language conversion to voice and controls home automation, demonstrating practical application of embedded systems and gesture recognition.

Arduino Python Hardware Integration

Image Classifier Project

Designed and implemented an image classification model as part of the Udacity AI Programming with Python Nanodegree, showcasing expertise in deep learning frameworks and Python.

Python Deep Learning Convolutional Neural Networks

RPA Projects (Student Pass/Fail Detection)

Developed and deployed Robotic Process Automation solutions using Blue Prism, including a Student Pass/Fail Detection system, to automate data processing tasks.

Blue Prism (RPA)

Netflix Clone Website

Created a responsive Netflix clone website, applying modern web development principles and user interface design techniques learned during the AICTE Frontend Development Internship.

HTML CSS JavaScript

Personal Portfolio Website

Designed and developed a professional portfolio website to showcase projects and skills, utilizing fundamental web technologies.

HTML CSS JavaScript

School Management System (Full Stack Java)

Developed a comprehensive school management system using Full Stack Java, encompassing user authentication, data management, and reporting functionalities.

Java Spring Boot MySQL HTML CSS JavaScript
